

PARTNERSHIP PROPOSAL

SwimBuddz × Rowe Park

Formalising and deepening a pool partnership in Yaba, Lagos — built around one shared goal: more hours in the water.

PREPARED FOR

Rowe Park Management
Rowe Park, Yaba, Lagos

PREPARED BY

DATE

11 June 2026

STATUS

Commercial proposal — for discussion

This document outlines a proposed commercial partnership. It is shared in confidence for discussion between SwimBuddz Limited and Rowe Park, and does not by itself create a binding agreement. Final terms will be set out in the SwimBuddz Pool Partnership Agreement.

1. Executive summary

SwimBuddz already swims at Rowe Park every week — coached group sessions, club training and community swims. This proposal turns that working, informal arrangement into a structured, mutually-committed partnership.

The model is simple: SwimBuddz brings Rowe Park a committed, scheduled block of recurring paying swimmers who return far more often than casual walk-ins, supplies its own coaching and safety supervision, and generates marketing exposure for Rowe Park at no cost — in exchange for lane access at a committed partner rate. Our north-star metric is the same number that grows Rowe Park's revenue: **hours in the water**.

The ask, in one line

A partner rate of ~~£~~1,500 per swimmer per session (standard gate: ~~£~~3,000) for SwimBuddz-booked sessions in 1–2 lanes on a fixed weekly schedule — in return for committed volume, a visibly branded community, corporate and event traffic, and weekly marketing exposure at no cost.

2. Why this matters to Rowe Park

A pool earns when people are in the water. SwimBuddz exists to put more people in the water, more often — which makes our incentives and Rowe Park's point in exactly the same direction.

- **Aligned north star.** We measure the whole business by hours in the water. That is precisely the metric that drives a pool's utilisation and revenue.
- **The frequency multiplier.** A structured community keeps swimming front-of-mind and members accountable. Our working thesis is that a SwimBuddz member visits 3–5× more often than a casual swimmer — the "Prime effect" applied to a pool.
- **Predictable demand, not sporadic walk-ins.** We commit to a minimum number of sessions per month on a fixed timetable, and we are happy to take off-peak windows that would otherwise sit idle.
- **Marketing at zero cost to you.** Every session is content. Rowe Park is named and shown to a growing, engaged audience — week after week.

3. What SwimBuddz brings to the partnership

What SwimBuddz provides	What it means for Rowe Park
Committed, recurring utilisation	A scheduled block of sessions every month — predictable income, not guesswork.
Higher swimmer frequency	Members who come back week after week, raising overall hours-in-water at the facility.
Our own coaching & safety supervision	Certified coaches run our sessions; reduced duty-of-care load on your staff.
Operator liability insurance	SwimBuddz carries its own cover for its members and coaches during SwimBuddz sessions.
A visibly branded community	We are kitting out our swimmers — including corporate wellness cohorts — in SwimBuddz caps, wear and merch: an organised, professional presence on deck.

What SwimBuddz provides	What it means for Rowe Park
Branded content & social exposure	Weekly photo/video featuring Rowe Park by name — usable by you too, at no cost.
Corporate & event traffic	Corporate wellness cohorts and group events bring new, paying swimmers on-site.
In-house competitions (planned)	SwimBuddz gala days will bring swimmers, families and spectators on-site — extra traffic and visibility for Rowe Park.
One organised point of contact	Clean scheduling, advance booking notice, and a single partnerships contact.

4. Already proven at Rowe Park

This is not a cold pitch — it is a request to put structure around something that already works.

- **A weekly rhythm.** Coached group sessions, club training and community swims run on-site every week — Saturdays plus mid-week slots.
- **Growing, verified numbers.** 106 verified swimmer check-ins across 46 sessions between February and early June 2026 — see "By the numbers" at the end of this document.

Formalising the partnership protects both sides: Rowe Park gets committed volume on a reliable weekly schedule; SwimBuddz gets dependable lane access at a rate that lets it keep growing here.

5. Proposed commercial structure

Recommended: partner rate + committed weekly volume

- **Partner rate.** ₦1,500 per swimmer per session (standard gate rate: ₦3,000) for SwimBuddz-booked sessions, settled on verified digital headcounts.
- **Committed volume.** A minimum block of scheduled sessions each month on a fixed weekly timetable, booked in advance — including off-peak windows that would otherwise sit idle.
- **In exchange.** Dependable access to 1–2 of Rowe Park's 8 lanes during agreed windows, at the partner rate.

How the numbers could work (illustrative)

Item	Illustrative value
Scheduled sessions per month	16 (about 4 per week)
Average swimmers per session	10
Swimmer-visits per month	160
Partner rate per swimmer	₦1,500
Monthly value to Rowe Park	₦240,000
Annualised	≈ ₦2.88M / year
For reference: May 2026 verified volume	49 swimmer-visits — and growing month on month

All figures are illustrative — the rate and the committed volume are to be set jointly. The principle is what matters: a partner rate turns otherwise-idle lane time into committed, predictable revenue that compounds as SwimBuddz grows.

6. Alternative commercial models

We are flexible on how the same arrangement is priced. Two clean options:

Model	How it works	Best when
Per-swimmer partner rate	¥1,500–2,000 per swimmer per session, settled on verified digital headcounts	Rowe Park prefers upside per head
Flat session fee	¥15,000–20,000 per session, any headcount up to agreed capacity	Rowe Park prefers simple, predictable income

7. Facility access to formalise

The partnership works best when access is clear and dependable for both sides. We propose agreeing:

Item	To confirm with Rowe Park
Windows & days	Fixed weekly timetable (e.g. Saturday mornings + mid-week slots)
Lane allocation	1–2 of Rowe Park's 8 lanes per session, clearly assigned during our windows
Capacity per session	Maximum swimmers, including up to 2 SwimBuddz staff (coach / safety / content)
Booking lead time	24–48 hours' notice for schedule changes
Blackout dates	Maintenance / facility events, with reasonable notice
Cancellation terms	Fair handling where either side cancels at short notice

8. Marketing & brand exposure

- **Weekly social posts** featuring Rowe Park by name, reaching a growing, engaged swimming audience.
- **Professional photo and video** captured at every session — free for Rowe Park to re-use on its own channels.
- **Branded presence on deck** — we are kitting out our swimmers (including corporate cohorts) in SwimBuddz caps, wear and merch, making every session look organised and professional.
- **Featured-partner listing** across SwimBuddz community touchpoints.
- **Corporate cohorts** put partner-employer branding on-site and associate Rowe Park with quality wellness programming.

9. Safety, liability & insurance

Rowe Park is responsible for	SwimBuddz is responsible for
Structural safety, hygiene and statutory compliance of the facility	Conduct and supervision of its members and coaches during SwimBuddz sessions

Rowe Park is responsible for	SwimBuddz is responsible for
Water quality to Nigerian / WHO public-pool guidelines	Operator liability insurance covering its coaches and members
Lifeguard on duty and stocked first-aid during sessions	Safeguarding for minors (1:10 ratio for under-12s; guardian check-in/out)

Mutual indemnity applies; any incident is reported between the parties within 24 hours. Full detail sits in §5 of the SwimBuddz Pool Partnership Agreement.

10. Term & flexibility

- **Initial term:** 12 months at the agreed partner rate, then reviewed jointly.
- **No exclusivity required.** Rowe Park is a public facility — this arrangement reserves specific lanes in specific windows, nothing more. Both sides stay free.
- **Exit:** either side may end the arrangement with 30 days' notice; confirmed bookings are honoured.
- **Governing law:** the laws of the Federal Republic of Nigeria; Lagos State jurisdiction.

11. Mutual commitments at a glance

SwimBuddz commits to	Rowe Park commits to
A committed block of scheduled sessions each month	Agreed access to 1–2 lanes during booked windows
Certified coaching and safety supervision on the water	Water quality, lifeguard and first-aid to standard
Its own operator liability insurance	Changing rooms, showers and basic swimmer facilities
Weekly content featuring Rowe Park, free to re-use	Reasonable booking-confirmation turnaround
On-time payment at the partner rate, on verified headcounts	The agreed partner rate for the term

12. Proposed next steps

- 1 Agree the partner rate (this proposal anchors ₦1,500 per swimmer) and the committed monthly volume.
- 2 Confirm the weekly timetable, lane allocation (1–2 lanes) and blackout dates.
- 3 Complete the facility snapshot (Appendix A of the Pool Partnership Agreement).
- 4 Execute the 12-month SwimBuddz Pool Partnership Agreement.
- 5 Go live and run a first joint marketing push announcing the partnership.

By the numbers — verified at Rowe Park

February – June 2026. Every figure below is a per-swimmer check-in recorded digitally at poolside — measured, not estimated.

106

verified swim check-ins

46

sessions delivered

6.6

visits per swimmer (avg)

75%

swimmers active 2+ months

Weekly swim check-ins at Rowe Park — roughly five-fold growth from February to late May 2026.

- **Predictable demand (\$2).** 89% of sessions ran in fixed Saturday windows; monthly sessions grew from 4 in February to 21 in May — committed, scheduled volume, not walk-in traffic.
- **The frequency multiplier (\$2), now measured.** Active swimmers visited 1.8× per month in February and 3.8× by May — the community effect the partner-rate model is built on, visible in the data.
- **Auditable headcounts (\$5–6).** Each check-in is a per-swimmer digital record, so per-swimmer billing settles on verified counts both sides can trust — not estimates.
- **The growth target (\$5).** The commercial illustration models ~160 swimmer-visits per month — about 3× May's verified 49. That is the next stage this partnership is designed to reach, on a curve already five-fold up since February.

Why a partner rate makes sense

SwimBuddz is Nigeria's first and only structured swimming community — and it grew up at Rowe Park. A partner rate keeps that growth compounding here: every new swimmer we add becomes recurring, verified volume for the pool.

Counts are verified "present" check-ins by swimmers (coaches and volunteers excluded). June 2026 covers 1–6 June only. Source: SwimBuddz production attendance records, exported 11 June 2026. Aggregate counts only — no individual member data is shared.

Ready to move

Full terms are set out in the SwimBuddz Pool Partnership Agreement, ready to execute as soon as the commercial terms above are agreed. We would love to make Rowe Park the home of SwimBuddz in Yaba.
